

ABOUT POWDERCOATED ALUMINIUM & STAINLESS STEEL

Tribù uses European, ultra-durable and scratch-resistant powder coatings that guarantee a high UV-resistance for 15 years. If well maintained, both powder coated aluminium and powder coated stainless steel have an excellent resistance to corrosion.

GENERAL GUIDELINES

- Cleaning should be done preferably during cloudy weather or in the shade. Make sure your furniture is cooled down before you start.
- Beware of sensitive flooring and wear protective gloves.
- Do not use any abrasive sponges, steel brushes, wonder sponge or any abrasive/caustic cleaner.
- Do not use a high pressure cleaner nor a steamer.
- Make sure your furniture is clean and completely dry before you apply protective products.
- Storage during winter time or long absence: before storing, we recommend good cleaning and protection of your furniture. Store only in a dry, unheated and well-ventilated room and never use non-breathable plastic covers. Tribù offers custom-fit protective covers. Contact your dealer for more info.

RECOMMENDED PRODUCTS

1. Aluminium Cleaner
2. Teflon Protector
3. Paint Pens
4. Aluminium Corrector

CLEANING

- Cleaning is simple with clear water and a pH-neutral fluid detergent. Do not use abrasive sponges or cleaning agents.
- Stubborn stains can be removed with **Aluminium Cleaner** (1). Spray the product evenly in one movement onto the surface and let it soak in for 1 to 2 minutes.
- Make circular movements with a soft hand brush to release the dirt from the surface and let the cleaner soak for another minute. If the surface dries too fast, you can mist it with some water.
- Finally rinse the surface abundantly with clean tap water and dry the furniture with a clean microfiber cloth.
- Candle wax can be removed with boiling water.

NOTE ABOUT NATAL ALU SOFA STRAPS

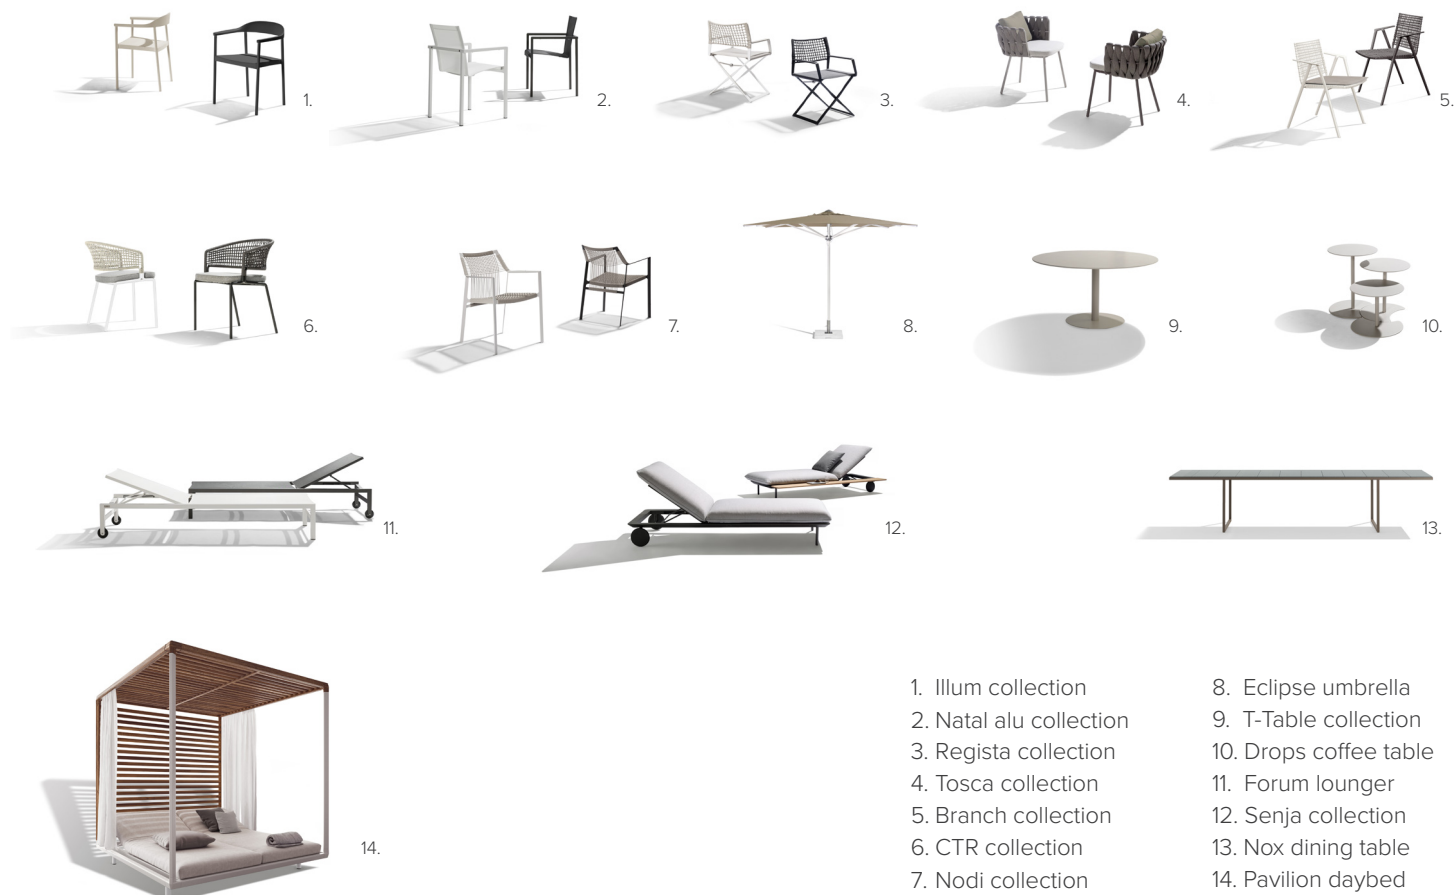

The seats of the Natal Alu sofa are made of straps in coated polyester. They are stain repellent, have a lasting high tension and an excellent resistance to water, frost, heat, mould and mildew. They can be cleaned and protected with the same products as the aluminium frame.

PROTECTING

- We recommend to apply **Teflon Protector** (2) once or twice a year, which will act as a conditioner, intensifying the colour and reducing the adhesion of dirt and stains.
- Shake the Teflon Protector vigorously and spray a bit onto a clean microfiber cloth.
- Gently wipe with circular movements onto the surface.
- Finally remove excess product from the surface with a dry part of the cloth.

REPAIRING

Small scratches can be restored with our **Paint Pens** (3). For larger damages, you can use **Aluminium Corrector** (4). We advise restoring any damage to the powder coating immediately to prevent corrosion of the aluminium or stainless steel.
